RE: Coakly Landfill

Dear Ms Catri,

I am replying to your letter dated April 25, 1990.

The copy of the proposed plan for the site was not enclosed with the letter as the letter states. We have, however, reviewed the material at the North Hampton Public library. We sent to Concord for the Feasibility Study and have reviewed that also. We have been in attendance at all meetings held for PRP's.

The letter states that the EPA has information in their possession that they believe we were generators of hazardous waste. I guess this is all we have been trying to find out these months but we have been unable to get that information.

Waste oil from mowers has always been picked up by reclaimers. Batteries have been picked up by suppliers for recycling. Engines removed from mowers have always been given to High Schools, Vocational Training Schools etc., please see attached letters. Any other old engines, housings etc., have always been segregated and picked up by junk dealers. Our waste demands only one trip to a facility each week or one pick up of a small containers, practically all of which is cardboard, cartons, packing material, etc. We do not understand how we can even be on the list.

We have not joined the Steering Committee since we feel we have been improperly identified as a PRP and request that our name be deleted from the list.

Sincerely,

Mary A. Philbrick

261 BLACK POINT ROAD, P.O. BOX 175, SCARBOROUGH, MAINE 04074 - DIAL (207) 883-2828

To: Philbrick's Sales & Service

From: Maine Battery Dist.

Subject: Philbrick's Core Returns

To Whom It May Concern;

Philbrick's Sales & Service has been a valued customer of ours for over 14 years. In those 14 years we have always picked up their cores per our agreement. We in return ship them back to the Manufacturer for recycling. If there is a problem in the way we are handling their cores or you need more information please feel free to call.

Sincerely;

*Roger Sandberg*

Philbrick's Sales & Service  
179 Lafayette Road  
North Hampton, NH 03862

Dear George:

This letter is to express my thanks for the many donations over the years of small engines and assorted material for the various small engine courses I have taught, including here at Danville.

Since 1975, your generous donations have not only helped my teaching, but have saved the taxpayers of several communities considerable money. Any future donations will also be greatly welcome.

Sincerely yours,

A handwritten signature in dark ink, appearing to read "M. Dean Schruben". The signature is fluid and cursive, with the first letters of the first and last names being capitalized and prominent.
